BUSINESSES: FREE 60 day e-card trial on our sortweb site. Sign up and try it for 60 days, no charge!

SET HOME (START PAGE): Here's an easy way to set your home page to either one of ours. We know that if you have a slower connection, you may want 'the old home page'. We've now split into WORLD and LOCAL. Both portals are linked so you can get back and forth between them.

VIRUSES: we've had over 50 systems come in since our last newsletter to have viruses removed. There's still more out there, and a quick test is to try and update your virus software. If you can't, it's already in your system. The top viruses found were:

- Klez
- MagistrB
- Sircam
- W32.Hybris

Did you know that you can use Hotmail to get and filter your local mail? It's free, but you're limited to a 2MB mailbox. [Click here](#) to download a printable file that shows you how to set it up. **Matter of fact:** I'm so sick of fixing klez that if you go to our website, click on File Server and look under software, there will be a fix for klez you can download (tip: after you download it, reboot into safe mode before you run it)

RENEWAL POLICY: Accounts due at the end of the month will receive an overdue notice a few days into the new month. If they are not promptly renewed, we will shut down the account and we *may* have to start collecting the \$10 reconnect fee stated on your signup sheet. If your account stops working after the first week of a new month, please check that you are not overdue before calling in. You may have overlooked a renewal notice in your mailbox.

POSTING STUPID THINGS IN THE GUESTBOOK: Kids, the old guestbook no one else can find. The new one traces you. Both tell us when you enter stuff, and we look at it. We won't threaten you. We'll just call your Mom and she'll slap you upside the head, Matthew!
