

## Max Internet Technologies Inc. May 2004 Newsletter

*If you miss a newsletter, they can be downloaded at [www.maxit.net/newsletters/](http://www.maxit.net/newsletters/).*

**New Look for Website:** If you've visited [www.fsjames.com](http://www.fsjames.com) lately, you will have noticed that it has been updated with a more modern look. It's been redesigned to load faster and allow easier access to contents. If you haven't seen it, go take a look. It has been designed to be used as your start page, with items relevant to you living here. FSJGoogle search is instantly available from there to meet your needs.

[MENU: **In the Fort – Lido Theatre**], you can download a printable theater schedule.

[MENU: **In the Fort – Dining**], restaurant takeout menus

[MENU: **Tools – BuyNSell**], a free Buy & Sell site

[MENU: **In the Fort – For Sale**], list your business, property or help wanted ad

[MENU: **Quick Links – Banking**], provides links to your in town banks

[MENU: **Tools – Messages**], and online message board & forum for Fort St. James. Prince Rupert's has over 900 registered users. Ours has only nine, c'mon people...

**Renew Your Account Online:** Now you can renew your account online with PayPal. PayPal is one of the largest and most secure online payment systems there is. You simply obtain an account using your Visa, MasterCard, American Express, or bank. Then you can make payments via PayPal and never have to give anyone else your card number! A PayPal account will allow you to shop at thousands of other websites (including e-bay)!. Online renewals offer you even more savings on your account [ie 3 mos unlimited is \$79 including taxes, save \$3.44]. Click the pay online logo at [www.fsjames.com](http://www.fsjames.com)

**Fake e-mail still coming:** there is no *administration@cnetdirect.com*, *support@qlynx.com*, or *staff@fsjames.com*. These are virus-infected mails sent by someone's infected computer. The virus [netsky] takes a name from the infected computers address book and e-mails it a copy saying it is from staff, support, or administration @whatever\_your\_internet\_is.com. If it says **Re: your something** do not open it! We wish to remind all our customers that Max will not e-mail you attachments.

**Junk Mail and Virus Filtering:** There is an online poll at [www.fsjames.com](http://www.fsjames.com) to see how many of our users would be willing to pay a little extra to have us filter out junk mail and viruses for you. This would be a premium service that you do not have to buy unless you want it. Most Internet companies offer this service and if demand is big enough we will offer it too. If you want to filter mail yourself, read the following article:

**Mailwasher Filtering:** You can cut down your junk mail, your download time and avoid other mail problems by using MailWasher and filtering your messages first. This program is a must have for dialup internet users, as it downloads just the mail headers really fast and lets you delete mail you don't want to tie up Outlook with [*like the 16 Meg file of your nieces birthday party*]. Even though the BOUNCE feature isn't very useful anymore [*almost all the junkmail has a fake address for the sender*] it is able to immediately look for mail from certain domains, or containing certain words and mark it for deletion. When you hit PROCESS MAIL it tosses all these away and calls your normal mail program to get the rest. I use MailWasher with about 300 filter elements and SpamBayes for Outlook Pro and filtered 466 out of 474 messages. At [www.fsjames.com](http://www.fsjames.com), there's a complete set of downloadable instructions below the weather icon for [how to set up MailWasher filters](#).

**Up North Customers:** if you live in Tache, Pinche or Cassiar and can see the top of Murray Ridge, we're surveying people about interest in high-speed wireless. It will not be cheap and there would be a setup charge involved. E-mail [admin@fsjames.com](mailto:admin@fsjames.com) if you're interested in this option.
