

# Max

Internet Technologies Inc. **NOVEMBER 2004 NEWSLETTER**

**CNETDIRECT.COM HAS BEEN SOLD:** The domain name has been purchased from us and customers still using @cnetdirect.com for their e-mail must change to @fsjames.com. This is really easy to do, just make sure your reply to address is @fsjames.com and your mail servers are mail.fsjames.com. If you do not know how just go to [www.fsjames.com](http://www.fsjames.com) and click the links in the notices. Mail will only be forwarded for a few more weeks, so don't put this off.

**MAX ADSL:** Yet another reminder that we too sell ADSL, and you get local service for it through Max. When you call for service and the phone rep tells you that you *must uninstall your virus protector*, it should be a major clue that the rep is a *total moron*. Do not ever uninstall your virus protector unless you're changing to a better one. See us for better ADSL, we feature better Business ADSL with same day service.

**FSJ PIX:** If you have a nice picture of Fort St. James, you can place it into our Image Gallery. When there are enough pictures, we will make a new slideshow on the VISITORS link so people can get an idea of Fort St. James. To get to the Image Gallery, click the image thumbnail on [www.fsjames.com](http://www.fsjames.com). Log in with the username 'public' and the password 'pictures', then click upload a picture on the top of the screen. You can add comments and your name if you want people to know it's your picture. You may also register yourself and start your very own online image albums!

**DOWNLOADING MUSIC:** Please be aware that the Recording Industry contacts us weekly demanding that we turn your names over to them. We don't because it a breach of your privacy. But you *are* stealing the music you download, so don't count on doing it forever. Eventually the court will make it illegal like in the USA. There are many sites where you can download for 99c a song and you won't have to worry about viruses or spy-files from them either. On the same track, *don't even think about* downloading movies. They take a long time, most don't work and most that do are really low quality. You can also get dinged for bandwidth charges if you download movies because the files are so big (4 Gigabytes).

**COMPUTER SPECIALS:** Max has computers on sale from \$499 up, in time for Christmas. Come in and see our stock of hot new cases for new computers, or to upgrade your old one. We will have the new **Alien** computer cases in first week of November. We also have cold cathode lites and LED fans in stock.

**WIRELESS:** We are in the process of upgrading our wireless equipment and have had a little difficulty with supply. The new parts are on their way (*courier guys!*), and should be in place by mid-November. If you're interested in wireless service, call us, but we will not be doing any installs until the new parts are in place. Now that they know there's *no Max Internet in Fort St. John* and returned the parts to Colorado, things should happen in a semi-reasonably-timely fashion.
